La documentation technique/produit est exclusivement destinée aux plombiers et aux personnels qualifiés.

Penser à la remettre à l'utilisateur.

Domaine d'application:

Un fonctionnement avec des accumulateurs sans pression (chauffe-eau à écoulement libre) n'est **pas possible!**

Caractéristiques techniques

Pression dynamique:	minimale 0,5 bar – recommandée 1 à 5 bars
Pression de service:	10 bars maxi.
Pression d'épreuve:	16 bars
Débit à une pression dynamique de 3 bars:	env. 12 l/min
Température de l'eau chaude	80 °C maxi.
Recommandée (économie d'énergie):	60 °C

Installer un réducteur de pression en cas de pressions statiques supérieures à 5 bars.

Eviter les différences importantes de pression entre les raccords d'eau chaude et d'eau froide!

Installation

Bien rincer les canalisations avant et après l'installation (respecter la norme EN 806)!

Possibilité de montage d'un limiteur de température (réf. 08 791).

Fonctionnement

Contrôler l'étanchéité des raccords et contrôler le fonctionnement de la robinetterie.

Fonction économie d'eau par point dur perceptible à mi-course d'ouverture du levier.

Limiteur de débit

La limitation du débit est déconseillée avec des chauffe-eau instantanés à commande hydraulique.

Maintenance

Contrôler et nettoyer toutes les pièces, les remplacer le cas échéant.

Fermer les arrivées d'eau en cas de maintenance.

Contrôler le siège des joints lors du montage de la cartouche.

Insérer la bague fileté et serrer jusqu'au blocage.

Pièces de rechange voir vue explosée (* = accessoires spéciaux).

Entretien: voir les instructions d'entretien

This technical product information is exclusively for the installer or trained specialists.

Please pass these instructions on to the user.

Application:

Operation with unpressurised storage heaters is **not** possible.

Specifications

Flow pressure:	min. 0.5 bar – recommended 1 – 5 bar
Operating pressure:	max. 10 bar
Test pressure:	16 bar
Flow rate at 3 bar flow pressure:	approx. 12 l/min
Hot water inlet temperature	max. 80 °C
Recommended (energy saving):	60 °C

If static pressure exceeds 5 bar, a pressure-reducing valve must be fitted.

Avoid major pressure differences between hot and cold water supply.

Installation:

Flush piping system prior and after installation of fitting thoroughly (Consider EN 806)!

Fitting a temperature limiter is possible (Prod. no. 08 791).

Function:

Check connections for leaks and check function of fitting.

Economy function due to perceptible resistance when opening the lever.

Flow rate limitation:

The use of flow rate limiters in combination with hydraulic instantaneous heaters is not recommended.

Maintenance:

Inspect and clean all components and replace if necessary.

Shut off water supply for maintenance work.

When installing the cartridge, ensure that the seals are correctly seated.

Screw in and tighten screwing.

Replacement parts: see exploded drawing (* = special accessories)

Care: see Care Instructions

A series of 21 horizontal lines, evenly spaced, extending across the width of the page, designed for writing.
