SHOWER CONFIGURATION XL WITH GROHTHERM SMARTCONTROL

## STIMULATE <br> YOUR SENSES

## GROHE SPA F-digital Deluxe: Lights, music, steam.

 stimulation for all the senses. It's time to transform you bathroom into a luxurious and inspiring home spa.With the power to fill your shower cabin with different coloured lights, your favourite music of the moment and cleansing steam, F-digital Deluxe is designed to soothe or stimulate all your senses. It is perfect for all your moods. At the touch of a button!

With GROHE SPA F-digital Deluxe you know your home is a sanctuary, complete with a sophisticated oasis of wellbeing you can control with your fingertips.

Thanks to GROHE SPA F-digital Deluxe, the bathroom is onger just a functional space. It is a life-enhancing experience that every day breathes new life into you tired body and soul.

## PLANNING A GROHE F-DIGITAL

 DELUXE STEAM ROOM
## IMPORTANT DETAILS!

Please read the following notes before planning and installing a GROHE F-digital Deluxe steamroom!

Coordination is the key. It is important to appoint an experienced supervisor before beginning construction to ensure each stage of the project is correctly carried out. Refer to the planning examples in this document for further details about the correct way to install the water supply, the drain pipes, the electrical cabling and the vapour barrier (if a steam generator is used).

Choosing materials. The materials used for the walls, the ceiling, the furniture and the electrical wiring and appliances must be carefully chosen to resist 100\% humidity.

Understand the installation notes and local regulations. Before work commences, the project supervisor must be familiar with all the general installation notes for GROHE F-digital Deluxe as well as the country-specific regulations concerning construction work, plumbing, electrical installation and the Technical Product Information (TPI).

Plan the installation carefully. Check the best place for the base unit box and steam generator, especially in relation to the waste outlet, the maximum length $(15 \mathrm{~m})$ of the steam pipe (copper pipe with a diameter of 15 mm ), and the need to completely isolate the steam pipe and pressure reducer. GROHE recommends the steam generator is located in a side room for easy maintenance. The steam generator is not to be installed outdoors. In addition, a pipe drain siphon is needed for boiling water after flushing. The drain has to be placed next to the steam generator, but not directly below, to prevent upcoming steam.

To avoid damage to the building please ensure adequate ventilation of the room above the ceiling shower and protect the surfaces with an appropriate moisture-resistant paint.

Consult a qualified electrician. As installing steam generators, electronic products and/or electric cables in wet rooms can be hazardous it is important to use a qualified electrician. All products in the GROHE F-digital Deluxe range must be connected using a dedicated circuit that is secured by an appropriate ground fault circuit interrupter (FI)! Please ensure you use an uninterrupted power supply. If this is not possible, GROHE recommends the installation of an uninterruptible power supply (UPS) in accordance with local regulations.
est and calibrate the system. After the system has been installed it is important to check if it is working properly. For the initial operation of the ystem an Apple or Android device with GROHE SPA App installed is needed Next, the pipes must be flushed, pressurized and checked for leaks. The initial peration steps are described in detail in the TPI (36397000 / 26374000 ).

Instruct the customer. When the completed steam room is presented the customer should be instructed in its use and receive a copy of all TPI

## INSTALLING A STEAM SHOWER <br> IMPORTANT DETAILS!

Attention: Please note the different installation depths of the products carefully! The wall and ceiling materials, the furniture and the components of the electrical supply must be carefully chosen to cope with $100 \%$ humidity. Please integrate a vapour barrier into the design of the steam shower cabin and a humidity-resistant seal between the door and ceiling. Please do not use a mosaic that has been glued to a mesh. The roof should have a gradient of $2 \%$ running down to the back wall and the tiled stone seats should have a gradient of $1-2 \%$ running down from back to front.

To avoid the risk of scalding do not use any metal materials for the seats and storage spaces.

GROHE recommends the steam generator is installed in a separate room for ease of maintenance, maximum safety and to comply with legal and regulatory requirements. The steam generator is not to be installed outdoors. A free floor drain or pipe drain siphon for boiling water is also needed next to the steam generator for flushing and decalcification.

To install only light and sound no separate space is needed, but it is important to keep a minimal distance between the SPA Showers Base Unit Box (control unit) and the shower (see VDE 0100 part 701 or EEC Norm). A locker (36 367000 ) can be used to coordinate all cables of the SPA Showers Base Unit Box.

The power supply should be installed higher than the steam generator and on the opposite of the flushing pipe to avoid contact with water

Do not direct the steam outlet at a wall, seating or any other object. There should be a free space of at least $70 \mathrm{~cm}\left(28^{\prime \prime}\right)$ in front of the steam outlet. Place the temperature sensor at a height of $1500-1700 \mathrm{~mm}$ as far as away from the steam outlet as possible. Diagonally opposite is best.

Ensure that steam rooms that are used continuously for more than two hours are ventilated by 10-20 cubic meters of air per person an hour. For detailed information see the 'Ventilation' section of the Steam Generator TPIs (36 362000 or 27934000 )

To avoid damage to the building please ensure adequate ventilation
of the room above the ceiling shower and protect the surfaces with

- an appropriate moisture-resistant paint.

## CAUTION!

Stay at least 12 " ( 30 cm ) away from hot steam escaping from steam outlet.

THE STEAM GENERATOR IMPORTANT DETAILS!

Do not make sharp bends or "elbows" along the steam pipe. A minimum radius of 50 mm is recommended. Do not allow sags or "water pockets" along the steam pipe and/or ventilation duct. All pipes must be completely isolated.

## CAUTION!

Prevent any type of obstruction along the steam line, such as a stop-off valve or tap. The internal diameter of the steam pipe must not be reduced valve or tap. The internal diameter of the steam pipe must not be reduced.
A connector for 15 mm copper pipe (soft steel pipe) is included. In countries that do not have this standard, the next higher diameter should be used.

The power supply to the steam generator via the feeder cable must not be broken. For that reason, avoid switches along the feeder cable.

Make sure the flushing pipe slopes all the way down to the waste outlet.

## CAUTION!

The steam generator's flushing pipe must always discharge into a pipe drain siphon outside the steam room itself. The water is very hot (boiling water).

The ambient temperature outside the steam room and around the steam generator must not exceed $35^{\circ} \mathrm{C}$.

De-scale the steam generator at regular intervals as instructed (please read the section on 'De-scaling' in the TPI of 27934000 or 36362000 . In hardwater areas, where calcium levels exceed $5-\mathrm{dH}$, GROHE recommends the installation of a filter system to avoid scaling.

## Architectural freedom to design a unique shower experience.

reate your own personal tailor-made spa experience with GROHE -digital Deluxe. This cosmopolitan, multi-sensory shower wil timulate all your senses and transform your bathroom into an indulgent space for physical, emotional and spiritual wellbeing. The intuitive GROHE F-digital Deluxe App lets you design your own personal combination of lighting, sound and steam - by wireless Bluetooth ${ }^{\ominus}$ connection - for a unique spa sanctuary in your own home.

## GROHE F-DIGITAL DELUXE

## CONFIGURATION M

## BRICKWORK

## SIZE OF THE SHOWER CABIN

 $1.10 \times 0.90 \mathrm{~m}$ROOM HEIGHT:
Ceiling height in steam bath should not exceed $2.20-2.30 \mathrm{~m}$.
To comply with local legal regulations GROHE recommends a side room for the steam generator and the base unit box; it should have a free floor drain/siphon.

Please have a look at the minimum/maximum volume of the steam cubicle in $\mathrm{m}^{3}$ on page 11

## LIGHTWEIGHT WALL CONSTRUCTION

Overview of the lightweight wall construction for the shower and the side room:
Fixing plates for steam outlet, temperature sensor, water controls and side showers.

Place the locker for the base unit box in the side room and fix it to the floor.

## INSTALLATION HEIGHTS:

- water controls: 1.15 m .
- side showers from ground: $0.85 \mathrm{~m}, 1.15 \mathrm{~m}$ and 1.45 m
- steam outlet: 0.2 m and 0.15 m from side wall.
- temperature sensor: 1.7 m
(with maximum distance to steam outlet).
The maximum distance from steam generator to base unit box should not exceed 4.5 m .

## ATTENTION:

Please note the different installation depths of the products carefully!

## DUCTWORK FOR CABLES

Install all concealed boxes; see installation heights on page 46.

Ductwork for cables has to be used for all electrica connections from the concealed boxes to the base unit box (ductwork diameter 21 mm ).

## ATTENTION:

At each side of the cable an excess length of 20 cm
is needed. Additionally corners and curves have to be added to total length!

## ATTENTION:

Avoid bends in cables and too close-rounded edges.

## DUCTWORK WITH CABLES

For an easy connection of the modules ensure the cables have at least an excess length of 20 cm for the concealed boxes.

## MAXIMUM CABLE LENGTH LIGHT

 \& SOUND MODULES9.5 m ( 5 m included in delivery).

## LIGHT MODULES:

Connection from base unit box to lamp 1. Loop through from lamp 1 (two ductwork connectors) to lamp 2 (one ductwork connector).

## SOUND MODULES

Connect $Y$ connector to the base unit box, split each pair of sound modules and place them opposite to each othe in the SPA cabin.

## GROHE F-DIGITAL DELUXE

 CONFIGURATION M
## PIPE INSTALLATION

Install concealed boxes for water controls and side showers. Connect the warm and cold water and install pipes for wate supply.

For installation heights please see table on page 50

## ATTENTION:

Please do not forget to integrate a vapour barrier!

## (2) <br> THE RIGHT SIDE

## UTILITY ROOM

and base unit box

The steam generator has to be placed where it is accessible for maintenance. water after flushing. The drain must be placed next to the steam generator but not directly below it to prevent upcoming steam.

All pipes must be completely isolated.

## FRONTAL VIEW BASE UNIT BOX

WALL COVERING

While wall covering is carried out, please ensure the overhanging cable ends remain in position; otherwise connection of the modules is not possible

Please install each module in the concealed boxes and connect them according to the relevant TPIs.

For the initial operation of the SPA shower cabin an Apple or Android device with GROHE SPA App installed is needed.

Connections of all single modules with the base unit box of configuration M , including power supply ( 1 power supply with $2 \times 1$ single light module and $2 \times 1$ single sound module).

## GROHE F-DIGITAL DELUXE CONFIGURATION L

If you have the space, why not build a $160-\mathrm{cm}$-wide large shower? Use the extra space for a full-width bench on which to enjoy the water, light, sound and steam from F-digital Deluxe together. With two speakers in the shower F-digital Deluxe together. With two speakers in the showe room and two outside, you can also listen to your music outside the shower. Experience true 3D showering with he luxurious Rainshower ceiling shower 20" with light and six side showers. The reliable and accurate Grohtherm F thermostatic controls steer all the different sprays as well as the Sena hand shower.

## BARE BRICKWORK

## SIZE OF THE SHOWER CABIN:

$1.60 \times 1.20 \mathrm{~m}$
ROOM HEIGHT:
Ceiling height in steam bath should not exceed $2.20-2.30 \mathrm{~m}$
To comply with local legal regulations GROHE recommends a side room is used for the steam generator and the base unit box; it should have a free floor drain/siphon.

Please have a look at the minimu /maximum volume of the steam cubicle in $\mathrm{m}^{3}$ on page 11

## LIGHTWEIGHT WALL CONSTRUCTION

Overview of the lightweigh wall construction for the shower and the side room:
Wooden base for the side showers, sound modules above, water controls as well as the steam outlet and temperature sensor above the side showers on the right side.

Place the locker for the base unit box in the side room and fix it to the floor.

## INSTALLATION HEIGHTS:

- water controls: 1.15 m .
- side showers from ground: $0.85 \mathrm{~m}, 1.15 \mathrm{~m}$ and 1.45 m
- sound modules: 1.75 m .
- steam outlet: 0.2 m and 0.2 m from side wall.
- temperature sensor: 1.7 m
(with maximum distance to steam outlet).
The maximum distance from steam generator to base unit box should not exceed 4.5 m .

## ATTENTION:

Please note the different installation depths of the product carefully!

## DUCTWORK FOR CABLES

on page 46 .
Ductwork for cables has to be used for all electrical
connections from the concealed boxes to the base unit box (ductwork diameter 21 mm ).

## ATTENTION:

At each side of the cable an excess length of 20 cm is
needed. Additionally corners and curves have to be added to total length!

## ATTENTION:

Avoid bends in cables and too close-rounded edges.

DUCTWORK WITH CABLES

For an easy connection of the modules ensure cables have an extra 20 cm for the concealed boxes.

## MAXIMUM CABLE LENGTH LIGHT

 \& SOUND MODULES 9.5 m ( 5 m included in delivery).
## LIGHT MODULES:

Connection from base unit box to lamp 1. Loop through from lamp 1 (two ductwork connectors) to lamp 2 (one ductwork connector)

## SOUND MODULES

Connect $Y$ connector to the base unit box, split each pair of sound modules and place them opposite to each other in the SPA cabin. One pair for free placement in the bathroom

## GROHE F-DIGITAL DELUXE

 CONFIGURATION L
## BARE BRICKWORK

Install all other concealed boxes for water controls and side showers.

Connect the warm and cold water and install pipes for water supply.

For installation heights please see table on page 50 .
ATTENTION:
Please do not forget to integrate a vapour barrier!
