# THE NEW GENERATION OF GROHE BLUE PURE WATER SYSTEMS

For the ideal everyday routine: The GROHE Blue Pure water system is more than just a tap. It allows the enjoyment of delicious, filtered water straight from the tap. Now, it comes in four newly relaunched designs to make every drop of water even more tasty, sustainable, and convenient. GROHE Blue Pure taps provide refined water of pure quality – and thanks to its sophisticated filter technologies it fits every water quality.

## MULTIFUNCTIONAL TAP

Filtered and usual tap water from one kitchen tap

## PERFECTLY TASTING DRINKING WATER

The GROHE Blue Pure water system turns local tap water into delicious refreshment right from the tap

## PREMIUM FILTRATION TECHNOLOGY

Wide range of GROHE Blue filters for different water quality

## LIMESCALE PROTECTION

Water filter reduces limescale and extends the life span of household devices

## NO MORE DRINKING WATER IN THE PLASTIC BOTTLES

Say goodbye to dragging of heavy water crates and collecting big piles of plastic bottles

## DECLUTTER YOUR KITCHEN

No more storage place for drinking water is needed as well as you don't need any filtration devices on your countertop

# A BOTTLE FREE ZONE FOR A MORE SUSTAINABLE LIFESTYLE

Drinking tap water has a lot of benefits: The convenience of getting freshly filtered water straight out of the kitchen tap on demand makes bottled water become obsolete. The filter’s space-saving shape effortlessly fits the kitchen cabinet. By replacing plastic bottles with filtered tap-water, everyone can help to combat the global plastic waste problem. Moreover, CO<sub>2</sub> emissions and water consumption that occur in the production process of bottled water are saved. Sustainable living does not have to mean compromises, it’s even more comfortable: Dragging of heavy water crates, running out of water or last-minute supermarket trips as well as collecting big piles of plastic bottles are a thing of the past. With the water source in the kitchen fresh and filtered drinking water is available 24 hours a day and seven days a week.

## REDUCTION OF WATER CONSUMPTION

BOTTLED WATER

1 liter of PET-bottled water requires up to **7 liters<sup>1</sup>** of water

## REDUCTION OF CO<sub>2</sub> EMISSIONS

PET-bottled water requires at least **108.47 grams<sup>2</sup> CO<sub>2</sub>** per liter

## REDUCTION OF PLASTIC

Up to **800 single-use plastic bottles<sup>3</sup>** for a family of 4 per year

GROHE BLUE  
PURE\*

GROHE Blue Pure requires only **1 liter**

GROHE Blue Pure requires **5.35 grams<sup>2</sup> CO<sub>2</sub>** per liter

**0 bottles** for GROHE Blue Pure

\* Carbon Footprint analysis refers only to the fittings with filter. Does not apply to reverse osmosis filter technology.

## THE BENEFITS OF GROHE BLUE PURE FOR YOUR HOME

Add great taste to your kitchen, effortlessly, with a GROHE Blue Pure Filter Tap. GROHE Blue filter technology turns tap water into great-tasting filtered drinking water, reducing chlorine and other impurities that can impair taste. Separate internal water ways keep filtered and unfiltered water separate. The GROHE filter fits easily under your sink and the tap still offers all the usual functionality of a standard kitchen tap. Put pure, refreshing, filtered water at the heart of your kitchen with a GROHE Blue Pure tap.

### PERFECTLY TASTING DRINKING WATER

- 2 inner water ways for filtered & unfiltered water
- Hygienic mousseur with 2 outlets
- Drinking water approved materials only

### EASY TO OPERATE

- Classic one hand lever for normal tap water
- Additional handle to operate filtered water

### PREMIUM FILTRATION TECHNOLOGY BY BWT

- Filter portfolio matches every taste and water quality

### TIME COUNTER AND FLOWMETER TO MEASURE FILTER LIFETIME

- Day and liters counter & acoustic alarm, when filter needs exchange

### PERFECT MATCHING DESIGN

- Fitting to every kitchen style

# THE PERFECT MATCH FOR EVERY WATER CONDITION

No matter the location, GROHE’s filter portfolio matches every taste and condition. The GROHE Blue Pure tap will be combined with established GROHE filtration technologies. Filters for water enhancement improve the taste and smell of water by minimizing chlorine and rough particles. Filters for water safety not only improve the taste but also the hygiene level. By reducing limescale, bacteria, microplastic or heavy metals our GROHE Blue filters additionally support safe water consumption and make drinking pure water from the tap possible for everyone.

THE INDIVIDUAL CHOICE OF FILTRATION  
FOR PERFECT TASTE

**ACTIVATED CARBON MINI FILTER**  
If you live in a soft-water area, the activated-carbon filter is right for you. It improves the taste but leaves the carbonate levels in the water untouched.  
Capacity @ <9° dKH: 1500 L

**S-SIZE FILTER**  
Suitable for hard water areas. This filter minimizes chlorine to improve the taste and reduces limescale to ensure that household devices can perform perfectly over its longer lifetime.  
Capacity @ 20° dKH: 600 liters

**MAGNESIUM + ZINC FILTER**  
For the better taste and vitality benefits, the magnesium + zinc filter is the ideal choice. It adds up to 35 mg magnesium and up to 3 mg zinc to each liter of water, helping you get enough of these essential minerals while delivering the best tasting tea and coffee possible.  
Capacity @ 17° dGH: 400 liters

**ULTRASAFE FILTER**  
Removes microplastic (> 1µm), 99,999 % of bacteria and up to 99,5 % of lead. It forms a barrier to harmful microorganisms and guarantees purity and hygiene.  
Capacity: 3000 liters or 6 months

System Tested and Certified by NSF International against NSF/ANSI Standards 42 for the reduction of Chlorine, Taste and Odor. And Standard 53 for the reduction of Lead.

# GROHE BLUE PURE REVERSE OSMOSIS FILTER TECHNOLOGY

GROHE Blue Pure's new filtration technology is second to none and the perfect addition for the safety and vitality conscious. The Reverse Osmosis filter that we've added to our portfolio use reverse osmosis filtration technology, which is one of the most effective types of filtration at present. But what does this term mean? Osmosis filtration is when the tap water is being pressed through a semi-permeable membrane. Clean water passes through and find its way into your glass and impurities stay behind and are being flushed in the drain. The difference from standard water filtration is that contaminants are flushed down the drain and are not collected in the filter. Reverse Osmosis Mineralization filter not only purifies your tap water, but also adds essential minerals for better taste and vitality benefits.

## BENEFITS:

Complete water cleaning

Mineralization filter enriches water with magnesium and silicate

No storage tank required – water is always freshly filtered

Exchange both cartridges at the same time in 12 months

## REVERSE OSMOSIS FILTER

Significantly removes impurities from source water, including chemicals, bacteria, hormones and viruses. Delivers pure and safe drinking water.

Filter lifetime: 12 months

## REVERSE OSMOSIS MINERALIZATION FILTER

In addition to the reverse osmosis membrane this filter not only significantly removes unwanted impurities but also enriches water with magnesium (40 mg/l) and silicate (55 mg/l) for better taste and vitality.

Filter lifetime: 12 months
