# GROHE PVD

Made-to-last surfaces ranging from precious matt to shiny like a diamond. The special recipe to success lies in our long-lasting surface quality. GROHE uses state-of-the-art technology to deliver exceptional quality finishes.

The physical vapour deposition (PVD) process ensures that the surface composition is three times harder than chrome, delivering glistening gold or sophisticated stainless steel finishes. As well as being harder, the surface is also ten times more scratch resistant than chrome, so it can be cherished for a lifetime.

3 x MORE SURFACE HARDNESS THAN CHROME  
10 x MORE SCRATCH RESISTANCE THAN CHROME
