THE BENEFITS OF GROHE SMARTCONTROL

JUGGLING KITCHEN TASKS?

Multi-tasking is a fact of the modern world, and nowhere more so than in the kitchen, where the collision of family life, meal prep and entertaining mean you often have your hands full. So why can't everything be just that little bit easier? With the new GROHE SmartControl it is, offering innovative push-operation that is effortless to use. Instead of grappling with a lever handle with wet hands, simply press the button to start and stop the water flow. Holding a full pan or a pile of plates? Just push with your wrist or elbow. It couldn't be more simple. Turning the same button alters the flow, and there is even a water-saving option. Temperature control is as straightforward as a twist of the valve on the tap's body. Smooth and intuitive to use for the whole family, SmartControl is the perfect solution for anyone who too often has their hands full in the kitchen. And what could be easier than that?
