GROHE

PUBLIC WASHROOMS FROM GROHE

WHY GROHE?

INSPIRING YOUR VISION. DELIVERING SUCCESS.

We are your professional partner for ensuring your public washrooms have the best quality products however tough your build budget.

Public washrooms reflect the design, hygiene and exacting standards of the establishment. Investing in GROHE products, winner of the “Red Dot: Brand of the Year”, is another way for a business to show that it cares and that it values quality.

Whatever type of project you are working on, GROHE offers a full spectrum of products for the washroom. The UK projects team have assisted in the specification of a magnitude of different projects – each with its own specific requirements.

THE BENEFITS OF GROHE TOUCHLESS FOR YOUR PROJECTS

Water saving. Sensor activated fittings can be set to deliver the optimum water flow automatically stopping after the user has left the washing area.

Hygiene. Touchless activation eliminates a potential source of cross contamination and spread of bacteria.

Design. The clean design of GROHE fittings also prevents dirt from accumulating in corners

Easy installation especially for retro-fits. The electronics are installer-friendly and can be fed by a transformer, a water turbine or a battery with an exceptional seven-year lifespan.

Auto flush, thermal disinfection and cleaning mode. Safety and hygiene is enhanced thanks to simplified settings for automatic flushing, thermal disinfections and cleaning stop function.

Specific adjustments for every application. Detection range and shut-off delay can be adjusted depending on specific requirements via remote control. Selected products with Bluetooth® can communicate with smartphones making it easier than ever to read out consumption data and set a variety of functions.

SAVING PRECIOUS RESOURCES

FOR GENERATIONS TO COME

Sensor activated fittings can be set to deliver the optimum water flow automatically stopping after the user has left the washing area. In this way they contribute towards achieving the highest standards in terms of sustainability by minimising water use and our integrated EcoJoy water-saving technologies can also generate significant water and energy savings from the outset.

GROHE also have a Powerbox that contains a water turbine that generates energy, so no battery or mains power is needed.

Additionally, GROHE demonstrates through our Sustainability Report and Sustainability accolades that we have made a serious corporate commitment to protecting the planet. GROHE aims for all of its manufacturing plants to become carbon-neutral during 2020. An industry first.

DESIGNED FOR PERFORMANCE AND SAFETY

ENDURING DESIGN OUTSIDE AND IN

Our history of great German engineering, lifecycle testing and numerous external certification processes are what gives our customers complete confidence in a name they can trust that delivers on performance, safety, durability, maintenance and return on investment.

Creating a hygienic washroom. The risk of bacteria being present on surfaces in public washrooms has increased the demand for a touch free washroom environment. Sensor activated flushing systems for WC's and urinals and automatically operated faucets are all available to make the specification of the washroom easier for the designer, and more hygienic for the user.

To complete the ideal washroom and to make planning and installation as effective and fast as possible, the GROHE Rapid SLX frame system is designed to support wall hung WC's and urinals. By raising them off the floor cleaning is both faster and more effective.

Protection against bacterial build up. GROHE thermostats, sensor operated taps and the versatile Grotherm Micro can all be easily set to deliver high temperature flush throughs if not activated for a set period or as part of a planned maintenance regime.

Easy to clean surfaces. The smooth surfaces and the high-quality escutcheons and seals on GROHE special fittings are designed to prevent dirt from accumulating easily. The clean design of GROHE fittings also prevents dirt from accumulating in corners and allows the waste water to flow away unobstructed. As a result, the surfaces are easier to clean and the scope of the cleaning work is significantly reduced.

FOR EVERY BUDGET

UNBEATABLE VALUE ACROSS ALL PRICE POINTS WHATEVER THE PROJECT.

Our extensive portfolio covers a range of price points enabling you to source your sanitary fittings and sanitary ware from a single supplier – GROHE.

Public washrooms reflect the design, hygiene and exacting standards of the establishment. In high traffic areas bacteria can quickly develop which is why GROHE recommend that public washrooms incorporate both touch-free and barrier-free solutions to fulfil the requirements all guests including the less able.

GROHE has received over 400 design and innovation awards. We invest heavily in the development of new products to ensure our portfolio is the freshest in the industry.

"I think you are too humble when you say, 'beautiful stadium', too humble. You have to say the best stadium in the world. That's the reality."

Jose Mourinho, Head Coach of Tottenham Hotspur Football Club

TOTTENHAM HOTSPUR STADIUM CASE STUDY

Project name:
Tottenham Hotspurs Football Stadium

Year of completion:
2018

Location:
North London

Client:
Tottenham Hotspur Football Club

Architect and Principal Designer:
Populous

Structural Engineer:
BuroHappold Engineering & Schlaich Bergermann Partner

M&E Consultant:
BuroHappold Engineering

Main Contractor:
Mace

GROHE products:
Essence bath, shower and basin mixers (dressing rooms)
Euphoria hand shower (dressing rooms)
Rapid SL frames (public washroom)
Skate Cosmopolitan flush plate (public washroom)

Tottenham Hotspur Stadium is a new benchmark in global stadium design, offering one of the finest spectator experiences in the world and, by incorporating a fully retractable pitch, becoming the first purpose-built home for the NFL in Europe.

With a capacity of over 62,000 the stadium heralds a new era for Tottenham Hotspur Football Club and has created a major landmark for both Tottenham and London.

GROHE frames and flush plates have been used in all of the public conveniences. GROHE Essence basin, shower and bath mixers have been used in the home and away dressing rooms as well as in the corporate hospitality areas.

REFERENCE PROJECTS

McDonald's Olympic Park, London

The two-storey timber structure, which only existed during the 2012 Olympic and Paralympic Games, was situated right next to the Olympic Stadium and had 1,500 seats. At the time, it was the largest McDonald's restaurant in the world. Once the Games had ended, the building was dismantled and, in the spirit of the "greenest Games ever", up to 75% of it was recycled. Almost all the components have been recycled, whereby the furniture and fittings have been distributed to existing or future restaurants in Great Britain.

In the public washrooms, self-closing GROHE Contropress wash basin faucets very effectively reduced water consumption.

Heathrow Terminal 3 Business Lounge London

The "No.1 Traveller Lounge", in Heathrow Airport's Terminal 3, offers travellers a wealth of entertainment and relaxation opportunities amid luxurious surroundings. In the bistro and bar, two or three-seater Chesterfield sofas and tailor-made chaise-longues upholstered in vibrant Romo fabrics provide the ultimate in comfort. A spa, relaxation areas and single or twin rooms provide sufficient space to relax and unwind.

The luxurious toilets in the Lounge are fitted with easy-to-install GROHE Rapid SL installation systems and water-saving GROHE Skate Cosmopolitan WC flush plates. Innovative GROHE technology combined with clever water-saving functions guarantee greater efficiency by reducing water consumption.
