GROHE SPA TAILOR-MADE SHOWERING

Flexibility for your GROHE SPA. The bathroom was once merely functional. Today, it's a refuge, a place to refresh and renew. It's a sanctuary from the outside world; a haven of indulgence. Bathrooms are larger; different zones are now defined. Each is an investment in your health and wellbeing, a place where daily rituals become sensational experiences.

With GROHE SPA, your home sanctuary can be completely tailor-made – from the basin to the bathtub, to the head showers, hand showers and handles, to the thermostats including light, sound and steam. Everything can be made your way, even down to GROHE Blue filtered water.

STIMULATE YOUR SENSES

GROHE SPA F-digital Deluxe: Lights, music, steam...

stimulation for all the senses. It's time to transform your bathroom into a luxurious and inspiring home spa.

With the power to fill your shower cabin with different coloured lights, your favourite music of the moment and cleansing steam, F-digital Deluxe is designed to soothe or stimulate all your senses. It is perfect for all your moods, at the touch of a button!

With GROHE SPA F-digital Deluxe you know your home is a sanctuary, complete with a sophisticated oasis of wellbeing you can control with your fingertips.

Thanks to GROHE SPA F-digital Deluxe, the bathroom is no longer just a functional space. It is a life-enhancing experience that every day breathes new life into your tired body and soul.

PLANNING A GROHE F-DIGITAL DELUXE STEAM ROOM

IMPORTANT DETAILS!

Please read the following notes before planning and installing a GROHE F-digital Deluxe steamroom!

Coordination is the key. It is important to appoint an experienced supervisor before beginning construction to ensure each stage of the project is correctly carried out. Refer to the planning examples in this document for further details about the correct way to install the water supply, the drain pipes, the electrical cabling and the vapour barrier (if a steam generator is used).

Choosing materials. The materials used for the walls, the ceiling, the furniture, the electrical wiring and appliances must be carefully chosen to resist 100 % humidity.

Understand the installation notes and local regulations. Before work commences, the project supervisor must be familiar with all the general installation notes for GROHE F-digital Deluxe as well as the country-specific regulations concerning construction work, plumbing, electrical installation and the Technical Product Information (TPI).

Plan the installation carefully. Check the best place for the base unit box and steam generator, especially in relation to the waste outlet, the maximum length (15 m) of the steam pipe (copper pipe with a diameter of 15 mm), and the need to completely isolate the steam pipe and pressure reducer. GROHE recommends the steam generator is located in a side room for easy maintenance. The steam generator is not to be installed outdoors. In addition, a pipe drain siphon is needed for boiling water after flushing. The drain has to be placed next to the steam generator, but not directly below, to prevent upcoming steam.

! To avoid damage to the building please ensure adequate ventilation of the room above the ceiling shower and protect the surfaces with an appropriate moisture-resistant paint.

Consult a qualified electrician. As installing steam generators, electronic products and/or electric cables in wet rooms can be hazardous it is important to use a qualified electrician. All products in the GROHE F-digital Deluxe range must be connected using a dedicated circuit that is secured by an appropriate ground fault circuit interrupter (FI)! Please ensure you use an uninterrupted power supply. If this is not possible, GROHE recommends the installation of an uninterruptible power supply (UPS) in accordance with local regulations.

Test and calibrate the system. After the system has been installed it is important to check if it is working properly. For the initial operation of the system an Apple or Android device with GROHE SPA App installed is needed. Next, the pipes must be flushed, pressurized and checked for leaks. The initial operation steps are described in detail in the TPI (36 397 000 / 26 374 000).

Instruct the customer. When the completed steam room is presented, the customer should be instructed in its use and receive a copy of all TPIs.

INSTALLING A STEAM SHOWER

IMPORTANT DETAILS!

Attention: Please note the different installation depths of the products carefully! The wall and ceiling materials, the furniture and the components of the electrical supply must be carefully chosen to cope with 100 % humidity. Please integrate a vapour barrier into the design of the steam shower cabin and a humidity-resistant seal between the door and ceiling. Please do not use a mosaic that has been glued to a mesh. The roof should have a gradient of 2 % running down to the back wall and the tiled stone seats should have a gradient of 1–2 % running down from back to front.

To avoid the risk of scalding do not use any metal materials for the seats and storage spaces.

GROHE recommends the steam generator is installed in a separate room for ease of maintenance, maximum safety and to comply with legal and regulatory requirements. The steam generator is not to be installed outdoors. A free floor drain or pipe drain siphon for boiling water is also needed next to the steam generator for flushing and decalcification.

To install only light and sound no separate space is needed, but it is important to keep a minimal distance between the SPA Showers Base Unit Box (control unit) and the shower (see VDE 0100 part 701 or EEC Norm). A locker (36 367 000) can be used to coordinate all cables of the SPA Showers Base Unit Box.

The power supply should be installed higher than the steam generator and on the opposite side of the flushing pipe to avoid contact with water.

Do not direct the steam outlet at a wall, seating or any other object. There should be a free space of at least 70 cm (28") in front of the steam outlet. Place the temperature sensor at a height of 1500-1700 mm as far as away from the steam outlet as possible. Diagonally opposite is best.

Ensure that steam rooms that are used continuously for more than two hours are ventilated by 10–20 cubic meters of air per person an hour. For detailed information see the 'Ventilation' section of the Steam Generator TPIs (36 362 000 or 27 934 000).

! To avoid damage to the building please ensure adequate ventilation of the room above the ceiling shower and protect the surfaces with an appropriate moisture-resistant paint.

CAUTION!

Stay at least 12" (30 cm) away from hot steam escaping from steam outlet.

THE STEAM GENERATOR

IMPORTANT DETAILS!

Do not make sharp bends or "elbows" along the steam pipe. A minimum radius of 50 mm is recommended. Do not allow sags or "water pockets" along the steam pipe and/or ventilation duct. All pipes must be completely isolated.

CAUTION!

Prevent any type of obstruction along the steam line, such as a isolation valve or tap. The internal diameter of the steam pipe must not be reduced. A connector for 15mm copper pipe (soft steel pipe) is included. In countries that do not have this standard, the next higher diameter should be used.

The power supply to the steam generator via the feeder cable must not be broken. For that reason, avoid switches along the feeder cable.

Make sure the flushing pipe slopes all the way down to the waste outlet.

CAUTION!

The steam generator's flushing pipe must always discharge into a pipe drain siphon outside the steam room itself. The water is very hot (boiling water).

The ambient temperature outside the steam room and around the steam generator must not exceed 35 °C.

De-scale the steam generator at regular intervals as instructed (please read the section on 'De-scaling' in the TPI of 27 934 000 or 36 362 000. In hard-water areas, where calcium levels exceed 5° dH, GROHE recommends the installation of a filter system to avoid scaling.

Minimum / maximum volume of the steam cubicle in m³

Steam generator power in kW	Lightweight wall (hardened glass, Elysée/Excellent cubicle, etc.)		Heavy wall (tiles, concrete, stone, etc.)		Steam production kg/hr

CONFIGURATION

GROHE F-DIGITAL DELUXE

With GROHE's broad range of tailor-made showers, you have endless possibilities to create the shower you want to own, the way it should look and the way you want to shower, whatever your mood. Based on the space you have available, GROHE allows you to create inspirational luxury showers with Rainshower F-Series and F-digital Deluxe. Choose between bespoke solutions for a small individual shower cabin, up to a XL wellness zone for you and your partner.

XL SHOWER CONFIGURATION

GROHE F-DIGITAL DELUXE CONFIGURATION M

If you have enough room to install a small bench you also have the chance to enjoy luxurious steam therapy with the GROHE F-digital Deluxe steam generator. The three Rainshower F5" side showers on the right side are complemented by the F5" sound and light modules for a real stereo aqua visual and sound effect. Combine the showers with the powerful and flexible Grohtherm F mechanical water controls – always the right temperature – and a Sena hand shower.

GROHE F-DIGITAL DELUXE CONFIGURATION M

BRICKWORK

**SIZE OF THE SHOWER CABIN:**

1.10 x 0.90 m

ROOM HEIGHT:

Ceiling height in steam bath should not exceed 2.20–2.30 m.

To comply with local legal regulations GROHE recommends a side room for the steam generator and the base unit box; it should have a free floor drain/siphon.

Please have a look at the minimum/maximum volume of the steam cubicle in m³ on page 11.

LIGHTWEIGHT WALL CONSTRUCTION

Overview of the lightweight wall construction for the shower and the side room:

Fixing plates for steam outlet, temperature sensor, water controls and side showers.

Place the locker for the base unit box in the side room and fix it to the floor.

INSTALLATION HEIGHTS:

- water controls: 1.15 m.
- side showers from ground: 0.85m, 1.15 m and 1.45 m.
- steam outlet: 0.2 m and 0.15 m from side wall.
- temperature sensor: 1.7 m
(with maximum distance to steam outlet).

The maximum distance from steam generator to base unit box should not exceed 4.5 m.

ATTENTION:

Please note the different installation depths of the products carefully!

DUCTWORK FOR CABLES

Install all concealed boxes; see installation heights on page 46.

Ductwork for cables has to be used for all electrical connections from the concealed boxes to the base unit box (ductwork diameter 21 mm).

ATTENTION:

At each side of the cable an excess length of 20 cm is needed. Additionally corners and curves have to be added to total length!

ATTENTION:

Avoid bends in cables and too close-rounded edges.

DUCTWORK WITH CABLES

For an easy connection of the modules ensure the cables have at least an excess length of 20 cm for the concealed boxes.

MAXIMUM CABLE LENGTH LIGHT & SOUND MODULES:

9.5 m (5 m included in delivery).

LIGHT MODULES:

Connection from base unit box to lamp 1.
Loop through from lamp 1 (two ductwork connectors) to lamp 2 (one ductwork connector).

SOUND MODULES:

Connect Y connector to the base unit box, split each pair of sound modules and place them opposite to each other in the SPA cabin.

GROHE F-DIGITAL DELUXE CONFIGURATION M

PIPE INSTALLATION

Install concealed boxes for water controls and side showers. Connect the warm and cold water and install pipes for water supply.

For installation heights please see table on page 50.

ATTENTION:

Please do not forget to integrate a vapour barrier!

**VIEW FROM
THE RIGHT SIDE**

UTILITY ROOM

Overview of the utility room, including steam generator and base unit box.

The steam generator has to be placed where it is accessible for maintenance.

In addition, a free floor drain/siphon is needed for boiling water after flushing. The drain must be placed next to the steam generator but not directly below it to prevent upcoming steam.

All pipes must be completely isolated.

FRONTAL VIEW BASE UNIT BOX

Connections of all single modules with the base unit box of configuration M, including power supply (1 power supply with 2 x 1 single light module and 2 x 1 single sound module).

WALL COVERING

While wall covering is carried out, please ensure the overhanging cable ends remain in position; otherwise connection of the modules is not possible.

Please install each module in the concealed boxes and connect them according to the relevant TPis.

For the initial operation of the SPA shower cabin an Apple or Android device with GROHE SPA App installed is needed.

GROHE F-DIGITAL DELUXE CONFIGURATION L

If you have the space, why not build a 160-cm-wide large shower? Use the extra space for a full-width bench on which to enjoy the water, light, sound and steam from F-digital Deluxe together. With two speakers in the shower room and two outside, you can also listen to your music outside the shower. Experience true 3D showering with the luxurious Rainshower ceiling shower 20" with light and six side showers. The reliable and accurate Grohtherm F thermostatic controls steer all the different sprays as well as the Sena hand shower.

Rapido C
Rough-in for single volume control

GROHE F-DIGITAL DELUXE CONFIGURATION XL

BARE BRICKWORK

**SIZE OF THE SHOWER CABIN:**

2 x 2.40 m

ROOM HEIGHT:

Ceiling height in steam bath should not exceed 2.20–2.30 m.

To comply with local legal regulations GROHE recommends a side room is used for the steam generator and the base unit box; it should have a free floor drain/siphon.

Performance of the waste: >100 l/min

ATTENTION:

The ceiling construction must be appropriate for the static requirement of the product (total product weight >70 kg).

Please have a look at the minimum/maximum volume of the steam cubicle in m³ on page 11.

LIGHTWEIGHT WALL CONSTRUCTION

Overview of the lightweight wall construction for the shower and the side room:

Wooden base for the sound modules, water controls as well as the steam outlet and temperature sensor.

Place the locker for the base unit box in the side room and fix it to the floor.

INSTALLATION HEIGHTS:

- water controls: 1.15 m.
- sound modules: 1.75 m.
- steam outlet: 0.2 m and 0.2 m from side wall.
- temperature sensor: 1.7 m
(with maximum distance to steam outlet).

The maximum distance from steam generator to base unit box should not exceed 4.5 m.

ATTENTION:

Please note the different installation depths of the products carefully!

DUCTWORK WITH CABLES

For an easy connection of the modules ensure cables have an extra 20cm for the concealed boxes.

MAXIMUM CABLE LENGTH LIGHT & SOUND MODULES:

9.5 m (5 m included in delivery).

LIGHT MODULES:

Connection from base unit to light curtain.

SOUND MODULES:

Connect Y connector to the base unit box, split each pair of sound modules and place them opposite to each other in the SPA cabin.

REAR VENTILATION IS REQUIRED.

BARE BRICKWORK

Install all other concealed boxes for water controls.

Connect the warm and cold water and install pipes for water supply.

For installation heights please see table on page 50.

ATTENTION:

Please do not forget to integrate a vapour barrier!

THE RIGHT SIDE**

GROHE F-DIGITAL DELUXE CONFIGURATION XL

UTILITY ROOM

Overview of the utility room, including steam generator and base unit box.

The steam generator has to be placed where it is accessible for maintenance.

In addition, a free floor drain/siphon is needed for boiling water after flushing.

The drain must be placed next to the steam generator but not directly below it to prevent upcoming steam.

All pipes must be 100 % isolated.

FRONTAL VIEW

Connection of all single modules with the base unit box of configuration XL, including power supply (2 power supplies with 2 x sound modules, 1 light curtain, 1 steam module, 1 Bluetooth®, 1 temperature sensor, 2 x single light modules)

WALL COVERING

While covering the wall take care to leave the overhanging cable ends in position; otherwise connection of the modules is not possible.

Please install each module in the concealed boxes and connect them according to the relevant TPIs.

For initial operation of the SPA shower cabin a mobile device with GROHE SPA App installed is required; it is not included with any GROHE F-digital Deluxe product.

INSTALLATION INSTRUCTIONS FOR ACCESSORIES

Basin set

Mirror	1100 - 1250 mm
Shelf	1150 - 1250 mm
Glass holder	1150 - 1250 mm
Soap dish	950 - 1050 mm
Soap dispenser	950 - 1050 mm
Towel ring	900 - 1000 mm
Towel rail	850 - 950 mm
Basin leading edge	850 mm

Recommended height*

WC set

Toilet roll holder	700 - 800 mm
Spare toilet roll holder	200 - 250 mm
Toilet brush set	200 - 250 mm
from the floor mounting height of WC without lid	400 mm

Recommended height*

Bath set

Towel rail 600/800 mm	1550 - 1750 mm
Robe hook	1550 - 1750 mm
Soap dish	100 - 350 mm **
Soap dispenser	100 - 350 mm **
Grip 300 mm	70 - 150 mm **

Recommended height*

Bidet set

Towel ring	900 - 950 mm
Soap dish	650 - 750 mm

Recommended height*

Shower set

Towel rail 600/800 mm	1550 - 1750 mm
Robe hook	1550 - 1750 mm
Soap dish	1200 - 1500 mm
Soap dispenser	1200 - 1500 mm
Grip 300 mm	1200 - 1500 mm

Recommended height*

RECOMMENDED INSTALLATION HEIGHT FOR SHOWERS

DESCRIPTION		SHOWER INSTALLATION HEIGHT (CM)				
Body height	H	150	160	170	180	190
Water controls	h0	105	115	120	125	130
Side shower	h1	60	70	70	75	80
Side shower	h2	95	105	110	115	120
Side shower	h3	130	140	150	155	160
Temperature sensor	h4	150	160	170	180	190
Head shower	h5	200	210	225	235	250

H = body height

h0 = height of the water controls

h1 = height of the knee shower

h2 = height of the hip shower

h3 = height of the shoulder shower

h4 = height of the temperature sensor

h5 = height of the head shower

Barrier free installation height of controller/diverter: 115 cm
