# MY VISION IS TO REVOLUTIONISE THE WAY WE CONNECT WITH WATER

Dear customers

As a forward-looking company we have always been at the forefront of advancing water technology – but I feel we are experiencing an unprecedented and exciting era of change where great design has created a truly global language, but also where the incredible diversity of culture and aesthetics across our planet is being explored and celebrated.

At GROHE we are proud to be at the heart of this changing global landscape, where the future of technology is already transforming our idea of the home into something smarter and yet also more personalised. We are passionate about the ways in which digital advances and innovative design are improving our own intimate relationships with where we live, down to the most personal of daily routines.

Take our latest innovation, the Spalet shower toilet, inspired by the growing demand for tailored intimate care and higher-than-ever standards of personal grooming. We have drawn on the expertise and ideas that have been at the heart of Japanese bathing culture for centuries by applying our own engineering expertise and design excellence. It's just one example of our ethos of combining the best aspects of traditional water culture with the latest cutting-edge technology. The result is a genuinely progressive product that will revolutionise the cleaning routines of consumers before the day has even begun.

Another of our latest innovations is 3D showering, where an intuitive push-button SmartControl with memory function delivers an ideal shower immediately, with no water wasted, and offers customers a comfortable, sensual, ecologically smart shower that is also simple to control.

At GROHE we know the importance of paying close attention to the needs and aspirations of all our customers, and innovating to meet them. As Masters of Technology we excel in design, technology, and sustainability, meaning we are perfectly equipped to provide products that exceed all expectations – both today and tomorrow.

**THEOCHARIS LIOLIS**

Master of Technology, produces unbeatable hardwearing faucet surfaces with GROHE StarLight®.

Timeless beauty and quality that lasts a lifetime - this captures the essence of the GROHE Masters of Technology pledge. With unfailing regularity, our experts deliver on it with brilliant products and unmatched performance.

It started with Carl Nestler, a manufacturer and developer of faucets for all kinds of tastes and purposes. Ever since then the Masters of Technology have done more than continuously change the world of faucets – we have improved it.

Ongoing investment in research and development at GROHE has led to the creation and launch of world-leading bathroom and kitchen innovations.

**RUURD V. LEEUWEN**

**JEANNINE FISCHER**

Master of Technology, uses a force meter to determine how little pressure is needed to operate a lever fitted with GROHE FeatherControl technology.

**MICHAEL POTTHOFF**

Master of Technology, uses a 3-D measuring table to ensure that ceramic sanitaryware and faucets are perfectly compatible.

All GROHE products are defined by their exceptional quality, with every component undergoing a series of stress tests – the toughest in the industry – to ensure ease of use and perfect looks. Only when they have passed with flying colours are they free to carry the GROHE name out into the world.

Activities such as washing hands, showering and making coffee may seem rather banal to the rest of us. But for the Masters of Technology at GROHE they represent a science all their own – one that we passionately seek to perfect with the ultimate in care, precision and meticulous attention to detail. All the while, we never lose sight of our goal – to share the 'Pure Freude an Wasser'.

At our facility in Hemer, in the Sauerland region, our engineers and designers work hand in hand to refine our innovative ideas. And fittings using GROHE SilkMove® ES combine ultimate ease of use with energy-saving innovations. This modern technology prevents the unnecessary heating of water when you use the moderate setting.

**Smart water conservation.** Respectful water resource management is another topic close to our hearts. Many of our fittings and shower systems are equipped with the revolutionary GROHE EcoJoy water conservation technology, reducing water use by up to 50%.

**Social responsibility.** As an international company, we are aware of our responsibilities to the environment. We maintain an open and objective dialogue with the general public. At our facilities we promote environmental awareness to improve the health and safety standards of our employees.

**Surveillance by independent certification partners.** Each of our facilities is regularly inspected by independent, external certification authorities in health, safety and environmental protection to ensure compliance with ISO standards. # ULTIMATE HYGIENE FOR 100 YEARS WITH AQUACERAMIC AND HYPERCLEAN

## GROHE AQUACERAMIC DOUBLE THE PROTECTION FROM IMPURITIES

It creates a smooth surface that impurities can't stick to, meaning impurities or residues cannot attach to the bowl and the powerful triple vortex flush easily cleans with one flush. This innovative surface treatment works in two ways – it uses a hydrophilic layer to prevent residues sticking to the bowl, and it uses nano-technology to prevent limescale latching onto the surface and attracting dirt and grime. The AquaCeramic surface is coated before firing and lasts more than 100 years! Even scrubbing won't wear it off. Alongside GROHE's HyperClean finish it locks out impurities and bacteria for good, making cleaning effortless and maintaining the sparkling, fresh-from-the-box finish.

## 100 YEARS OF CLEAN AQUA CERAMIC

## GROHE HYPERCLEAN NO CHANCE FOR BACTERIA TO GROW

Take confidence that your bathroom is hygienic and clean with GROHE HyperClean, which uses naturally anti-bacterial silver ions to inhibit germs and prevent stains and odour. During the glazing process this exceptionally smooth and hardwearing finish is added which prevents 99.9% of bacteria growth, meaning your ceramics stay sparklingly clean and germ-free with the minimum of effort. Take peace of mind from this feature, certified by the Society of Industrial Technology for Antimicrobial Articles, guaranteed to make your bathroom a safer, cleaner and germ free place for you and your family.

Ceramic materials proudly feature the SIAA (Society of Industrial Technology for Antimicrobial Articles) brand mark based on ISO for KOHKIN – stringent criteria for the anti-bacterial effect and the safety of the agent.

## EASILY CLEAN – WITH ONE FLUSH

**WITH**  
AQUACERAMIC

**WITHOUT**  
AQUACERAMIC

GROHE  
**PowerFlush**

## GROHE TRIPLE VORTEX THE POWER OF THREE

Unlike other toilets, GROHE's innovative triple vortex flush system creates a powerful vortex of water that swirls to cover and clean the whole of the bowl. Despite its power, this effective flush has low water consumption, with a dual flush option that uses just 5l of water and only 3l for a short flush. Instead of one or two water outlets, the Triple Vortex system flushes from three outlets – one at the back, one at the side and one at the base of the bowl – creating an incredibly powerful flush that leaves nothing behind.

## GROHE RIMLESS LEAVES BACTERIA NOWHERE TO HIDE

Corners and crevices are playgrounds for bacteria, especially under the rim of the toilet bowl. That's why we've created the "rimless" bowl where every surface is easy to reach and effortless to keep clean, even in the parts you can't see. In tandem with the triple vortex flush it makes this the cleanest toilet ever.

# INNOVATIVE DEVELOPMENTS FOR ULTIMATE TOILET HYGIENE

## HYGIENECLEAN

Outstanding hygiene features provide ultimate cleanliness. Combining our leading-edge anti-stick coating AquaCeramic and the HyperClean glaze that prevents the growth of 99.9% of germs you can be confident that your ceramic will stay clean for 100 years.

## AQUACERAMIC

Creates a smooth hydrophilic layer on the ceramic surface that dirt and limescale can't stick to, meaning there are no residues after flushing. Makes your toilet 100 years clean!

## HYPERCLEAN

This exceptionally smooth and hardwearing glaze uses silver ions to prevent 99.9% of bacteria growth, keeping your ceramic sparkling clean and germ-free.

## GROHE POWER FLUSH

Strong vortex action creates a high-suction force for an extra-powerful flush, thoroughly cleaning all corners of the toilet bowl.

## TRIPLE VORTEX FLUSH

Three water outlets create a powerful vortex effect with each flush, covering and cleaning every corner of the bowl for ultimate hygiene.

## RIMLESS TOILET BOWL

The rimless toilet bowl allows easier cleaning. No dirt collects on the rim, and the interior of the bowl is clean and bright – without splashing.

# GROHE ACCESSORIES

## WIDE VARIETY

**Functional details.** Many GROHE bathroom collections include a range of coordinated accessories, which reflects the design details and core values of the collection. Decorative and practical in equal measure – accessories afford the luxury of creating a cohesive bathing space.

For product information and technical details please see page 256 and following.

# GROHE THERMOSTATS

**Precision control for a relaxed showering experience.**

As our gauge when constructing GROHE thermostats we used the most sensitive thermometer around – your skin. The revolutionary thermostats in our Grohtherm range ensure that hot and cold water will touch your skin in exactly the proportions you desire. GROHE TurboStat® is a revolutionary technical feature – it provides the correct shower temperature in seconds and keeps it constant. The many elegant design features in these miniature technological marvels are wonderfully innovative.

# COMFORT, SAFETY, SAVINGS

We've all been there before. You've just stepped into the shower when someone else in the house either turns on a faucet or flushes the toilet; suddenly the temperature of your shower plummets or becomes scalding hot – leaving you with soap in your eyes as you try to manually adjust the temperature back to a comfortable level. Install a GROHE thermostat and you can be sure of a safe and enjoyable showering experience every time.

**What's inside?** Thermostatic valves work by constantly mixing hot and cold water to a pre-selected temperature. Even if there is a change in the water supply, the thermostat reacts by rebalancing the quantities of hot and cold water to maintain the correct temperature. In the most extreme cases, i.e. should the cold water supply fail, the hot water shuts off automatically in a fraction of a second to prevent scalding.

**Style choices.** GROHE offers concealed and exposed thermostats. With concealed models, the body of the mixer is installed behind the wall. With exposed thermostats, the mixer is mounted on the wall and all the pipe work is behind the wall.

**User-friendly features.** Our thermostats also feature a SafeStop button, to prevent children from turning up the temperature and scalding themselves, and an EcoButton to reduce water usage by up to 50%. Our EasyLogic controls are intuitive to use and cater to the entire family, whatever their height, while the AquaDimmer allows you to turn the water on and off, adjust the flow rate and divert between two water outlets, e.g. hand shower and bath spout.

**GROHE thermostats based on winning technology.** LGA QualiTest GmbH, a subsidiary of TÜV Rheinland, carried out a major product test in 2006 comparing several thermostats from leading European manufacturers. Our Grohtherm thermostats came out on top, receiving Number One ranking, thanks to their GROHE TurboStat® and GROHE CoolTouch® technologies. These results have strengthened us in our mission to continuously develop innovative technologies, as our aim is to offer you the best possible technology, always.

## GROHE's quick guide to thermostat technology.

### What is a thermostat?

A thermostat maintains an exact water temperature of your choice, independent of water use elsewhere at home.

### How does it work?

The thermostatic mixer valve mixes the hot and cold water and reacts instantly to any changes in the supplies, ensuring the temperature is maintained within one degree deviation.

### What are the benefits?

The pre-set temperature is reached within a fraction of a second and remains constant so there's no risk of scalding.

### Are there different types available?

Yes, GROHE offers many different models to suit every style of bathroom.

# GROHE TURBOSTAT®

**Always the right temperature, for ultimate convenience and safety.** GROHE TurboStat® technology lies at the heart of our new thermostat.

The thermoelement unrivaled sensitivity means it delivers water at the desired temperature within a fraction of a second – and keeps it constant for the duration of your shower. No more time and water wasted getting the temperature right. And if the cold water supply fails, it reacts instantly: hot water will shut off automatically to avoid the risk of scalding.

Compensating precisely for fluctuations in temperature and pressure results in a consistent and comfortable shower throughout.

### GALLERY

### EXPERIENCING ALLURE BRILLIANT

Inside and out, Allure Brilliant pushes the boundaries. With their confident and precise use of geometric shapes, Allure Brilliant explore the pure, linear appeal of minimalist architecture to create a striking and alluring portfolio of faucets, showers and fittings. Starting with the simplicity of a square or rectangle, the Allure Brilliant Collection utilises geometric forms to their full potential and takes faucets in a new direction with its clean angular lines and flat planes. An aperture at the end of the spout gives a new view of water – a cascading flow that entices and teases every time.

#### Faucet Styles

The Allure Brilliant Collection offers an extensive range of premium fittings for all points of interaction in your bathroom. From the basin to the bathtub and shower, the collection offers a wide range of products, giving you the freedom to tailor your bathroom to your specific requirements.
