GROHE Rapid SL is a concealed flushing system, installed within or in front of dry studded walls, for application with two prong wall hung toilets. Just choose a toilet bowl according to your personal taste and bring the design and comfort of your bathroom to a new level.
GROHE RAPID SL
KEY FEATURES

Save Water With GROHE EcoCare

Benefit from dual flush technology and use up to 50% less water. Pressing the large button will release all 1.6 gallons (6L) of water. Pressing the Eco button, flushes with a reduced 0.8 gallons (3L) volume.

With an effective flush of 1.1 gallons (4L), Rapid SL meets strict performance and building code standards as a CalGreen compliant product.

Robust & Reliable

With GROHE Safety Rapid SL provides the utmost level of security. A certified load bearing capacity and stability of the carrier has been confirmed at 880 lbs. (400 kg).

Compatibility

GROHE Rapid SL is compatible with any two-hole wall-hung toilet bowl offered by any major ceramic manufacturer for the utmost design freedom.

Maximum Noise Control For Quietest Operation

Since the Rapid SL is a concealed system, noise is considerably decreased in comparison to a traditional toilet. In addition, GROHE Whisper® technology provides low-noise fittings and the pneumatic actuator further reduces noise.

**GROHE Whisper®**

Thanks to decoupled pipe supports, sound isn’t transferred to the structure of the building when the water is released from the cistern to the bowl, allowing for convenient toilet positioning without fear of disturbing others.
GROHE RAPID SL
KEY FEATURES

Simple Maintenance

If any maintenance is required, the actuation plate is easily removed to expose the internal components. The opening behind the plate is large enough to allow direct access to the flush and discharge valve which are constructed so that they can be easily removed for any necessary maintenance.

Adjustable Toilet Height & ADA Compliance

Offering superior user comfort, GROHE Rapid SL allows for installation of wall mounted toilets with a rim height ranging from 15 1/2” to 19 1/2”. Because of the unit’s flexibility, Rapid SL can meet standard and ADA compliance.
Hygiene & Comfort

A traditional toilet can make cleaning difficult with many places for dirt, dust and germs to hide. A wall hung toilet mounted to a Rapid SL carrier does not touch the floor, offering a hygienic solution for easy and thorough cleaning.

Space Saver

Because the water cistern can be installed within the wall, Rapid SL saves approximately six inches of space compared to a standard toilet with a tank, making it ideal for small bathroom spaces.
The Rapid SL system gives you the freedom to design your ultimate bathroom by providing a secure and quick method of installing wall-hung basins, bidets, urinals and WCs. Available in three different installation heights, each frame comes pre-assembled with sanitary ware fixings and is subject to stringent testing – our WC frames are tested to hold 880 lbs (400kg).

Rapid SL accessory
For short WCs
• Required for WCs that are less than 7 ¼” (214mm) from the bolt holes to the bottom of the WC
RAPID SL
CHOICE & FLEXIBILITY

Whatever the size and shape of your bathroom, with Rapid SL you’re no longer restricted to four walls. Thanks to our versatile frame system, the layout and design choices for your new bathroom are endless – the only limit is your imagination. Mid- and full-height walls can be introduced not only to ‘zone’ wet and dry areas but to provide additional space for basins and bidets. Ideal for commercial settings, the in-line installation of Rapid SL accommodates side-by-side application.

Rapid SL can be mounted in front of solid walls, inside or in front of studded or freestanding walls. This offers the freedom to decide between multiple design layouts and determine the most effective use of the bathroom space.
ACTUATION PLATES FOR DUAL FLUSH

Users have the choice between single or dual flush feature to reduce water consumption by more than 50%. Pressing the large button will release 1.6 gallons (6L) of water. Pressing the Eco button, flushes with a reduced 0.8 gallons (3L) volume.

GROHE actuation plates are pleasantly small measuring only 6 1/8” by 7 ¾”.
