

WATER SECURITY FACTS

Pure Freude
an Wasser

PART OF LIXIL

A leak, a blocked sink, a burst pipe. One is suddenly faced with the loss of value of one's own property and immense renovation costs – not to mention the emotional stress that eliminating water damage entails.

54 %

of European households have already experienced at least one water damage.

65 %

of all water damage in Europe is caused by burst pipes or micro leakages.

2,297 €

makes the average damage value from water damage. **Almost a third** of the households remain at these charges despite insurance.

Only 1,404 € will be reimbursed on average by insurance companies per water damage incident.

Up to 93 % of all water damages could have been prevented with a **respective warning system** like GROHE Sense and GROHE Sense Guard. Special water sensors measure the room temperature and humidity, detect water build-ups and alarm when readings are unusually high or low. In case of emergency a product like GROHE Sense Guard, directly installed in the water pipe, can shut off the water supply immediately.

ADVANTAGES OF A WATER SECURITY SYSTEM

Quick and easy installation

Simple handling via app

Safety at home – even when absent

Minimization of risk by smart water sensors

Money saving through preventive protection of real estate

Subtle fit into every living ambience
