MAINTENANCE 

MAINTENANCE 

## English

### Application

Operation is possible in conjunction with:

- Pressurized storage heaters
- Thermally controlled instantaneous heaters
- Hydraulically controlled instantaneous heaters

Operation with low-pressure storage heaters (displacement water heaters) is **not** possible.

### Flush piping system prior and after installation of faucet thoroughly!

### Specifications

- Flow rate at 45 psi flow pressure:
    - Spout
- |                  |                     |
|------------------|---------------------|
| 3 hole (25 048): | 25 L/min or 6.6 gpm |
| 5 hole (25 049): | 25 L/min or 6.6 gpm |
- 
- |              |                      |
|--------------|----------------------|
| - Handshower | 6.5 L/min or 1.7 gpm |
|--------------|----------------------|
- Flow pressure
    - min.: 7.25 psi
    - recommended: 14.5 - 72.5 psi
    - greater than 72.5 psi, fit pressure reducing valve
  - Max. operating pressure: 145 psi
  - Test pressure: 232 psi
  - Temperature
    - max. (hot water inlet): 158 °FThermal disinfection possible
  - Water connection: cold - RH  
hot - LH

### Notes:

- Major pressure differences between cold and hot water supply should be avoided.
- To be installed according to local codes and regulations.

### Replacement parts

(\* = special accessories).

### Observe the different replacement part numbers of the cartridges.

### Care

Instructions for care of this faucet will be found in the Limited Warranty supplement.

## Français

### Domaine d'application

Le service est possible en combinaison avec:

- Des chauffe-eau à accumulateur sous pression
- Des chauffe-eau instantanés à commande thermique
- Des chauffe-eau instantanés à commande hydraulique

Un service avec des systèmes d'eau chaude à écoulement libre **n'est pas** possible.

### Bien rincer les canalisations avant et après l'installation!

### Caractéristiques techniques

- Débit à une pression dynamique de 3 bar:
    - bec
- |                   |                     |
|-------------------|---------------------|
| 3-trous (25 048): | 25 L/min ou 6,6 gpm |
| 5-trous (25 049): | 25 L/min ou 6,6 gpm |
- 
- |          |                      |
|----------|----------------------|
| - douche | 6,5 L/min ou 1,7 gpm |
|----------|----------------------|
- Pression dynamique
    - min.: 0,5 bar
    - recommandée: 1 - 5 bar
    - supérieure à 5 bar, mise en place d'un réducteur de pression
  - Pression de service max.: 10 bar
  - Pression d'épreuve: 16 bar
  - Température
    - max. (admission d'eau chaude): 70 °CDésinfection thermique possible
  - Raccord d'eau: froide - à droite  
chaude - à gauche

### Remarques:

- Il convient d'éviter toute différence de pression importante entre l'alimentation en eau chaude froide et chaude.
- A installer conformément aux prescriptions et réglementations locales.

### Pièces de rechange

(\* = accessoires spéciaux).

### Tenir compte des différents numéros de pièce de rechange des têtes.

### Entretien

Vous trouverez les instructions d'entretien de ce mitigeur dans le supplément Garantie Limitée.

## Español

### Campo de aplicación

Es posible el funcionamiento en conjunción con:

- Acumuladores de presión
- Calentadores instantáneos con control térmico
- Calentadores instantáneos con control hidráulico

**No** instalar con acumuladores de baja presión (calentadores de agua sin presión).

### ¡Purgar a fondo el sistema de tuberías antes y después de la instalación!

### Características técnicas

- Caudal para una presión de trabajo de 45 psi:
    - caño
- |                       |                    |
|-----------------------|--------------------|
| 3-orificios (25 048): | 25 L/min o 6.6 gpm |
| 5-orificios (25 049): | 25 L/min o 6.6 gpm |
- 
- |         |                     |
|---------|---------------------|
| - ducha | 6.5 L/min o 1.7 gpm |
|---------|---------------------|
- Presión
    - min.: 7.25 psi
    - recomendada: 14.5 - 72.5 psi
    - si la presión es superior a 72,5 psi, se deberá instalar una válvula reductora de presión
  - Presión de utilización máx.: 145 psi
  - Presión de verificación: 232 psi
  - Temperatura
    - máx. (entrada del agua caliente): 158 °FDesinfección térmica posible
  - Acometida del agua: fría - a la derecha  
caliente - a la izquierda

### Notas:

- Deberán evitarse las diferencias de presión entre las acometidas del agua fría y del agua caliente.
- A ser instalado conforme a códigos y reglamentos locales.

### Componentes de sustitución

(\* = accesorios especiales).

### Prestar atención a los diferentes números de piezas de repuesto de las monturas.

### Cuidados periódicos

En el suplemento Garantía a Limitada encontrará las instrucciones relativas al cuidado de esta batería.
